

NGUYỄN PHI TUẤN ÂN

Web Developer

I'm currently working as a web developer, and I'm eager to learn new things/technologies.

My future goal is becoming an architect. But in case I have a chance to manage a team, hence I would take that chance because I'm really into integrating people together to make things better.

PROJECT

E-COMMERCE SHOP - JAGERTHEJAGERSHOP

2024

- Description: An e-commerce shop to sell Jagermeister.
- Current Function: Login using JWT token, making orders (With or without login), Calculate shipping fee using the API of Ahamove, Authorization by roles (ADMIN and NORMAL_USER)
- Workforce: 1
- Stack using: MERN Stack (MongoDB, ExpressJS, ReactJS, NodeJS), TailwindCSS
- Deployment platform: Netlify for Front-End and Render for Back-End server
- Drawback: Using free version of Render server for Back-End, hence the server would be in sleep mode if there is no coming requests and need to be woken up.
- Website Link: [Click here](#)
- Front-end Github link: [Click here](#)
- Back-end Github link: [Click here](#)
